DETAILED ACTION

1. The indicated allowability of the subject matter of various claims is withdrawn in view of the newly discovered reference, U.S. Patent No. 5,539,648. The delay in citation of this reference is regretted.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13,14,16,19,25 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker in U.S. Patent No. 5,539,648. Baker discloses using a pair of piezoelectric transducers (see column 5, lines 5-10) that vibrate the electrode along two orthogonal axes at an amplitude set by a gain control (see column 5, lines 48-50). Signals with a phase shift of 90 degrees are sent to the transducers to make a circular hole. Regarding claim 25, Baker discloses in column 5, lines 60-62 that servo-motors could be used instead of piezoelectric transducers. Piezoelectric transducers transmit ultrasonic vibrations.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 15 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.
